

LET'S BUILD THE COGENERATION INDUSTRIES COUNCIL

When you join the newly formed **Cogeneration Industries Council (CIC)** you are joining WADE and become part of a global network of leaders in the field of decentralized energy. Participation in the CIC allows you and others from your organization to help guide the activities of the CIC and WADE including: business development events, research priorities, conference agendas, policy positions and other areas of WADE's work. Join the CIC and take advantage of the following WADE opportunities and benefits:

- **Board and Committee Membership:** WADE members are eligible to serve on all committees, the Board of Directors, and for appointment to other industry positions as a WADE representative. WADE members can also nominate individuals to serve on the WADE Advisory Board **and the soon to be established CIC Advisory Board.**
- **Market Intelligence:** Members receive a host of information on markets, policies and developments tailored for those in the decentralized energy industry. This includes detailed market analyses and research reports, weekly updates, monthly updates and special alerts.
- **Meetings and Conferences:** WADE members receive reduced fees and sponsorship rates plus priority speaking opportunities at WADE's conferences and other events supported and endorsed by WADE.
- **Communications and Outreach:** WADE is the voice of the decentralized energy industry, representing the interests of the sector and promoting the many benefits of decentralized energy at a wide range of international events and forums. WADE also works to advance laws, regulations, programs and policies that are favorable to greater investment in and deployment of cogeneration systems and decentralized energy technologies. WADE serves as an advocate for decentralized energy and provides input to elected officials, regulators and other stakeholders. WADE also provides comments and filings in legal proceedings where critical policies are at stake.
- **Public Relations:** WADE works to educate stakeholders and potential cogeneration system adopters about the many benefits of decentralized energy using a wide range of communications tools and media.
- **Cogeneration and Onsite Power Production - the WADE Magazine:** Subscription to the magazine plus the opportunity to provide editorial features and articles regularly reaching **more than 15,000** subscribers and **42,000 monthly webpage viewers.**
- Eligibility for annual awards and your company name and logo in the online member directory.
- A membership certificate and CIC logo for your business cards and company website.
